

Debitek Copier Systems

Offers special promotions, discounts and pricing based on cardholder category

Debitek Copier Controllers can increase your reprographic service sales and add convenience to your cardholders by eliminating the need for exact change. Copier controllers enable cardholders to purchase photocopies, laser printouts, microfiche readings/printouts, and other reprographic services with their Debittek Electronic Cash Cards. Debittek Copier Controllers save you time and effort by eliminating coin counting, added security, accurate accounting, departmental tracking and low maintenance.

Copier Systems

Copier controllers

Benefits & Advantages

Secure and Convenient

- Increases sales and loyalty by eliminating the need for exact change
- Reduces service requirements to collect coin and repair coin related problems
- Reduces shrinkage and losses due to theft and vandalism

Superior Connectivity

- Supports virtually all copier and microfiche systems
- Easily installed on existing equipment

Easy To Use

- Insert your card, select the type of copy or service, push return button when finished
- Your card is automatically debited for the services and your card balance is displayed
- Card readers support both DCMS and electronic cash cards

Debitek's Optional Copier Management System

The Debittek Copier Management System (DCMS) is a fully integrated Windows™ based system for controlling and managing copier, laser printer and microfiche usage. The system enables cardholders to be assigned to departments for billing purposes and can limit access to designated equipment if necessary.

DCMS Features & Benefits

- Reduce reprographic costs by up to 20% by eliminating unauthorized copying and increased accountability by users
- Supports charge backs to individuals, departments or budgets
- Transaction price and access can be set independently by machine
- Allows for pricing in 1/10 th cent increments

Software Functionality

- Encode limited and unlimited charge cards
- Unlimited charge cards — Cardholders are limited to certain access privileges, but are not restricted to a maximum usage. All charges are posted to the cardholders budget or billing account
- Limited charge cards — Cardholders are restricted to a predetermined usage. All card charges are posted to the cardholders budget or billing account
- Detailed user profiles maintain information such as; name, SSN, department, card expiration, date, card type, access group and more
