

Smart Vend Network Payment Center

Provides instant verification
of an account to allow access.

Turn your costs into profit with the Smart Vend Network Payment Solution. With the Smart Vend Network Payment Solution you will be able to charge for copies, vending and manage printers on one all inclusive IP based system. Access to the terminals can be granted through the use of a magnetic stripe, smart chip, or proximity cards and/or a PIN based keypad included on the terminal. Staff or departmental billing and tracking is a standard feature of the system. Know exactly where your costs are occurring and interdepartmentally bill them through the use of a web based reporting system.

For a currency based system, customers may conveniently add value to their account through the use of an autoloader or from an account attendant. All transaction information is stored online eliminating the need for coins or cash at the access terminals. Since this is a network based system, if a card ever gets lost, the value can be immediately transferred over to a new card and the old account can be locked with a click of a button.

If you have a network and a need for a simple, yet thorough network based payment solution, then contact Smart Vend and we will help you turn your costs into profit and accountability.
